

**AMENDMENT TO THE SPECIFICATION**

Please replace the paragraphs beginning on page 6, line 20, to page 7, line 4, of the substitute specification (clean version) filed December 5, 2005 with the following rewritten paragraphs.

--Fig. 1 is a graph of experimental results of Example 2, which shows the influence of presence or absence of an incubation step (incubation of a cell-free protein synthesis reaction liquid in a state of containing components other than exogenous mRNA for a specified period of time prior to conducting synthetic reaction) on an amount of synthesized luciferase.

~~Fig. 2 is a graph of experimental results of Example 2, which shows the influence of the composition of a reaction liquid and a retention time in the incubation step on the amount of synthesized luciferase.--~~
